## **Message**

In view of the Sustainable Development Goals (SDG) adopted by the government of Bangladesh, quality education has become our focus of attention. Moreover, in order to bring the vision of "Smart Bangladesh" into existence quality education must play a pivotal role. Amidst the fast-paced globalization we must prepare ourselves for the challenges of the 21st century. Ensuring quality education is an uphill task which entails coordinated efforts of the government, educationists, researchers, teachers and learners. Arguably, to reach the goal of quality education we are visibly in need of competent and duly trained teachers, spacious and amiable classrooms, up to date study materials and technological support.

In keeping with the government's determination to ensure quality education, New Govt. Degree College, Rajshahi which is one of the most renowned colleges of North Bengal has taken a number of initiatives to make sure that the goal of quality education is reached. Along with the usual academic activities the college is determined to instill into its learners human values, patriotism, dedication to social welfare and the spirit of the glorious Liberation War of Bangladesh. We believe our learners will be able to face the challenges of the fast changing world and dedicate themselves to transforming our society on the basis of ethical, social and cultural values. We also hope that our learners will cherish the ideals of a state which will be free from corruption, violence, terrorism, consumerism, exploitation, discrimination, communalism and religious bigotry.

On the way to the vision of Smart Bangladesh, our learners must brace themselves for encountering the challenges of artificial intelligence and technology-based society. The

projects undertaken by the CEDP are a great assistance in our initiatives for ensuring our desired quality education. The CEDP has already implemented a number of commendable projects in our college. All these projects have proved highly effective for the learners. It is to be noted that the CEDP team members of New Govt. Degree College, Rajshahi have been working relentlessly to have the projects successfully accomplished. I express my heartfelt gratitude to the team members. However, the CEDP team of New Govt. Degree College, Rajshahi has been working accordingly and they are successful in this regard.

Lastly, I hope that New Govt. Degree College, Rajshahi will continue to march ahead with all its glory and contribute significantly to shaping Tomorrow's Smart Bangladesh.

# **Introduction**

## **1.1. Background of the College**

New Govt. Degree College is located at Kazihata Rajshahi, a place famous for medical treatment. Dr. Md. Samsuddin Mia was appointed as the founding Principal in 1965 thought the institution started its formal journey in July 1966. At the beginning the name of this institution was Rajshahi Govt. Intermediate College. At the time of being appointed as the principal of this institution Dr. Md. Samsuddin Mia was the vice principal of Rajshahi college where as the Principal was Prof. M. A Hai. From then there was a strong bond/relation between this renowned institution and Rajshahi Education Board. Despite the foundation of Rajshahi Education Board in 1961 continued its official activation at the new building of New Govt. Degree College. At the time the Chairman of Rajshahi Education Board was Pro. Shamsujjaman Choudhury, the former/ ex Principal of Rajshahi College. He didn't any room or block among three blocks the main building of college from 1965 to June 1966. In July, 1966 the official activities were started formally in the north block of the college building. Only 16 lecturer posts were created at the beginning and they were under the control of the Principal of Rajshahi College. The newly appointed Principal did all his administrative works of college. Al the period the DPI (officer of college and supervision) was Mr. Ferdous Khan and education secretary was Mr. Borhan Uddin.

Part of the students admitted in Rajshahi College were transferred to this college and thus first admission process was completed. For Intermediate classes in the first session 200 students were admitted in arts and commerce. At that time the college games and sports were held in the ground on the west side of the jail managing the permission of the DIG as the college ground was low. The college gymnasium was also built at that time to maintain educational qualifications as well as physical fitness. During the transfer of education board from the college building, the board authorities filled the low ground with the rental amount in lieu of payment and purchased scientific instruments for college with the cash Tk-50,000. Besides government provided one lakh for purchasing furniture and 80,000 for scientific equipment. In 1967 by purchasing essential laboratory equipment for Physics, Chemistry, Botany, Zoology and Geography, 250 students were admitted in science section.

Mathematics subject was also opened by appointing teachers under the direction of DPE. As there was no teacher in science section, the then Vice-Chancellor of Rajshahi University Professor Shamsul Haque (Former External Affairs Minister) dispatched one lecturer for Botany and another one for Physics subject in taking classes for up to three months. At this time, students' hostel was under construction equally using the ground floor of the college building for student accommodation. When the construction was over, the students were transferred to the hostel (now Shamsuddin Chhatrabas). After setting up the science laboratory at the college's own initiative, a science fair was organized. Seeing the collection of scientific equipment in the college, higher education department officials thought the college had all the advantages of introducing degree courses. Next, keeping in view the needs of students and parents and the physical infrastructure of the college being satisfactory, in 1972 with the direct support of the then Relief and Rehabilitation Minister of Bangladesh Government A.H.M. Kamaruzzaman Hena, the college opened the degree course getting the college to be known as New Govt. Degree College. In November 1968, Founder Principal till being transferred to the post of the Principal in Govt. Edward College, Pabna his sincerity, skill, prudence, above all bravery against all odds relentless efforts were being made to establish the college on a firm footing. Within three years of its establishment, the college provided education, especially sports and almost equal to Rajshahi College in cultural activities. To cherish the memory of the learned, scholar, wise Principal, the first dormitory of the college was named after the founder Principal Professor Dr. Md. Shamsuddin Mia. The second principal of this college Prof. Md. Haider Hussain also followed the work ethic of the predecessor and efforts have been made relentlessly to improve the quality of the college. The second dormitory of the college is 'Haider Hossain Hostel' named as a memorial of respect to him by all associated with the college. At present there are a total of 600 students in four sections in science, total 300 students in two sections in humanities and 300 in two sections in business studies. In order to expand higher education opportunities, in 1986 in Bengali and in 1999 onward honors courses were introduced in total 7 subjects including English, Economics, Botany, Zoology, Accounting and Management. From the academic year 2010-11, Honors courses in Physics, Chemistry, Mathematics, Political Science, Philosophy and History were launched. Honours courses in Geography and Environment from academic year 2013-14 and in Islamic history and culture from academic year 2014-15 were introduced.

A total of 1280 students in 15 subjects had the opportunity to enroll in the 1st year honors course. Apart from this, Masters Course is running in five subjects (Bengali, Political Science, History, Economics, Accounting). Once developed on a small scale 'Rajshahi Government Intermediate College' at present New Govt. Degree Rajshahi is now one of the best in the circle of time. College Premise is always active in the walk of about twelve thousand students. Currently there are opportunities to study in this college in 17 subjects at secondary level, 15 subjects each at graduate pass and honors level. 70 teachers are teaching here. Despite several limitations (shortage of teachers, inadequacy of physical infrastructure, housing problems) the college administration and teachers maintain the standard of the college relentlessly and with utmost sincerity. The then Principal Professor Dr. Farida Sultana's contribution is also undeniable for establishing the College Garden and Botanical Garden. Since the establishment of the college although there is no development of infrastructure after a long time in the financial year 2009-2010 the construction work of Academic Building-2 started in the financial year 2011-2012 and two storied is completed. Academic Building-2 was upgraded to the 4th floor in the financial year 2013-2014. The present principal has been with the present infrastructure of the college ever since he joined the college to raise the quality of education to the desired level with maximum utilization and enhancement of facilities. Central library of the college, classrooms, necessary renovation of main building, main gate, boundary wall and college garden already done. The principal lives in an old dilapidated building. Also modernization of college auditorium, beautification of all hostels including construction of standard reception rooms for parents necessary reforms have been made. To improve the quality of education, college is undertaking a coordinated program in consultation with parents. Steps have been taken to closely monitor the students. Overall presentation of all national days is very stylish and heartwarming in this college. Administratively constituted thirty different committees for this purpose are constantly working.

## **Chapter 6: Concluding Remarks**

### **6.1: Overall Assessment of Performance of the Last year and Key Target for the Next Year**

The teachers and the employees showed creativity and innovative skills in continuing academic and official activities in the changed pandemic situation. They showed quick adaptability and a communicative skill too. The all these are the part of their accountability with the profession. They also developed problem solving and inter personal skills.

We will arrange more in-house training programs, national and international webinars, cultural competition on virtual platforms, awareness programs and so on.

Evaluation systems will be introduced to ensure the professional commitment of the teachers and the employees as well.

### **6.2: Key Challenges and Risks for the College**

Risk Factors:

- Lack of motivation for academic performance
- Changing negative attitude to positive
- Help to boost up self-respect and level of confidence
- Reducing psychological problems

Key Challenges:

- Overcoming the academic loss during COVID-19 period
- Enhancing classroom performance
- Setting up technology-based classrooms
- Developing behavioral pattern and cultural attitude
- Increasing guardians' involvement
- No student should be left behind

### **6.3: Recommendations**

Day by day teachers and staffs of our college, develop their skills and knowledge in their daily instruction and in learning process. Once a day they cannot think teaching without technology. We increase technological facilities, such as Wi-Fi access for both teachers and students. Teachers and students of this college can share their ideas and knowledge home and abroad through interactive board (IB) technologies in real time. In periphery where Wi-Fi access was not easy for students that is being provided through Campus networking facilities almost free of cost. Effective online examination system can be introduced with the help of interactive panel technology. Teachers and officials' efficiency should be increased in technological fields by imparting training programs. They should be encouraged to be technology savvy. We need more training courses so that we can apply such kind of technology in teaching learning activities. Sufficient fund should be granted to maintain the goods and works procured under CEDP.
